Western Paraná State University - Unioeste

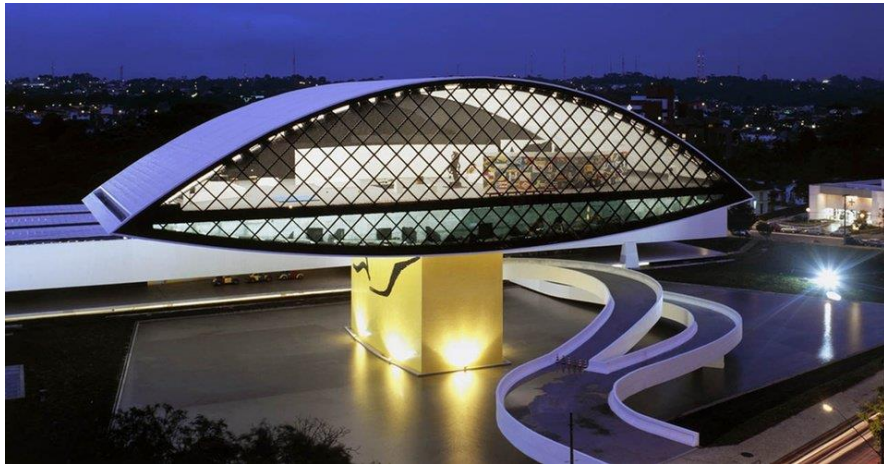

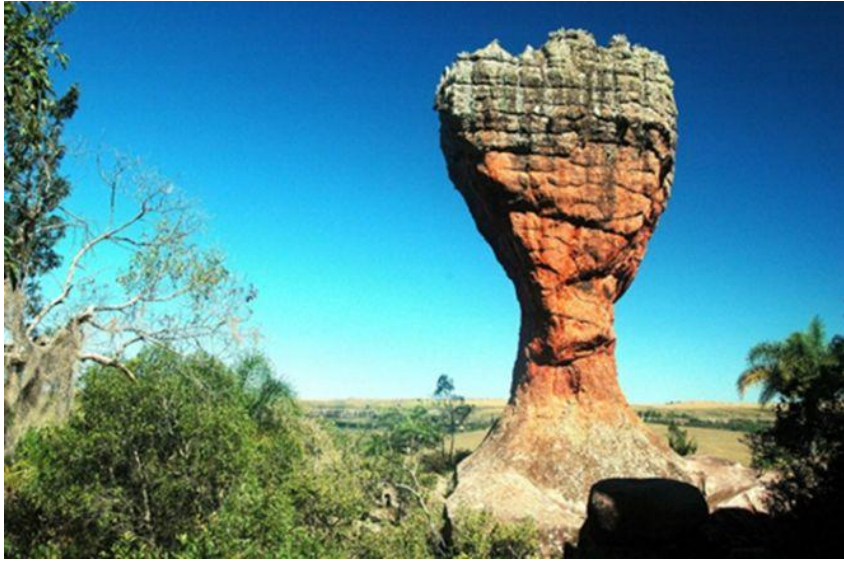

- O Estado do Paraná é uma das 27 unidades federativas do Brasil e está localizado na Região Sul, vizinho aos Estados de Santa Catarina, São Paulo, Mato Grosso do Sul e os países da Argentina e do Paraguai.
- Sua área é de 199.307.922 km², um pouco menor que a da Romênia, e figura como o 5º estado mais rico do Brasil.
- Sua capital é a cidade de Curitiba.

- O Paraná possui clima subtropical úmido, com amplitude térmica que varia de zero graus no inverno, até 40 graus no verão.
- A espécie predominante na vegetação é a Araucária angustifolia. Os ramos dessa árvore aparecem na bandeira e no brasão, símbolos adotados em 1947.

- 
- A região é caracterizada por uma população diversa, resultado de uma série de miscigenação entre portugueses e espanhóis, indígenas e escravos africanos, juntamente com a segunda onda migratória ocorrida por alemães, italianos, poloneses, japoneses, ucranianos, romenos, austríacos, húngaros, eslavos, ingleses, espanhóis, sírios, libaneses, chineses e suíços. Hoje também é possível encontrar argentinos, paraguaios, bolivianos e haitianos que vivem no Paraná.
